Stitched preview

Grid: 120 × 160 stitches

Regular chart: each printed sheet shows up to 60 × 70 stitches from this same grid (2-stitch overlap between sheets). More stitches per page !' smaller printed symbols and fewer chart pages. Same chart as the large-print PDF — not less detail in the stitch design.

Fabric: 14-count Aida

Finished size: 8.57 in × 11.43 in (21.8 × 29.0 cm)

Suggested fabric cut (includes margin): about 21 in × 24 in

DMC colors in chart: 27

Estimated total stitches: 19,200

Stitchability score: 34/100 (Ambitious)

This chart is an artistic interpretation. Thread colors are matched to DMC shades; results vary with fabric, dye lots, lighting, and technique.

How to use your chart

Fabric count tells you how many stitches fit in one inch. Higher counts mean smaller stitches and a smaller finished piece for the same chart.

Each square on the chart is one cross stitch. Follow the row and column guides along the edges.

Symbols inside each square tell you which thread color to use. Match the symbol to the legend.

Start from the center of your fabric unless you prefer another starting point. Many stitchers grid their fabric lightly with a washable pen.

Use the thread legend for shopping. Always compare floss at the shop when possible—dye lots vary.

Before you buy supplies, double-check colors against the legend in good lighting.

Thread legend
